REMINDER:

Two forms of ID are required to meet State requirements which mandate the City's attempt to verify citizenship. Acceptable documents are Birth Certificate, Driver's License, Social Security Card, or Passport.

ATTENTION: BUSINESSES SELLING GOODS AT RETAIL SALES:

New requirements as of January 1, 2009 as a directive from the State of Missouri, State Statutes (Section 144.083.2 & 144.083.4 RSMo) reads as follows:

The possession of a statement from the department of revenue stating no tax is due shall also be a prerequisite to the issuance or renewal of any city business license required for conducting business where goods are sold at retail. The statement of no tax due shall be dated *no longer than ninety (90) days before the date of the renewal of the city license.*

You may access this information on the DOR's Web site, seven days a week, 24 hours a day.

You will need your Missouri Tax Identification Number and Pin (the Dept. of Revenue has already assigned the PIN # and it can be found on the front of your return or voucher book.)

Go to: www.dor.mo.gov
Scroll down to under "What's New"
Click on *On-Line License No Tax Due Information
Log into on-line License No Tax Due System
Choose *Business Owner/Tax Payer

You will be able to print your own Statement of NO Tax Due to use when obtaining or renewing your business license.

NOTE****If your business does not make retail sales, you are not required to present a statement of no tax due to obtain or renew your license.

Business Inspection Checklist- General Guidelines

This list shows only the most common fire codes. Other codes, not listed, may be applicable.

Floor Plan of Building

An 8" X 11" drawing of the floor plan must be submitted to the Fire Department. The drawing should include the following information:

- Approximate dimension of the exterior of the building
- Show all entrance and exits
- Show location of all utilities coming into the building
- Show all locations with any hazard
- Show each floor of building
- Show location of stairs in building

Exit Signs

Exit Signs are required unless it meets the following exceptions:

EXCEPTIONS:

- Exit signs are not required in rooms or areas, which require only one exit.
- Two exits or exit access doorways from any space shall be provided where **one** of the following conditions exist:
 - The occupant load exceeds 50 **or**
 - The common path of egress travel exceeds 75'
 - Main exterior exit doors or gates which obviously and clearly are identifiable as exits
 - There are other exceptions but these are the most common.

If you need help figuring the occupant load contact the Building Inspectors office at 221-0111 or the Hannibal Fire Department at 221-0657.

If exit signs are required then they shall be internally or externally illuminated at all times. Exit signs shall be connected to an emergency electrical system provided from storage batteries, unit equipment or on site generator.

Emergency lighting

If emergency lights are there then they need to work. If the business is going to be occupied during the evening hours then emergency lighting is required. They will need to be mounted so the path to the exit is lit up.

Light Bulbs

Exposed bulbs less than 8' either need covered or replaced with fluorescent bulbs. This is really important in small storage closets.

Wiring/Electrical

Wiring less than 8' needs to be protected from physical danger. Cords/wiring shouldn't run through walls. All junction boxes, outlets and switches need covered. All splices should be in a junction box. Any old wiring that is disconnected needs to be removed. A 30" clearance should be maintained in front of any electrical panel. All covers should be installed and any openings filled on the electric panel.

GFCI Outlets

GFCI outlets are required in any bathrooms, over counter tops with water present and on rooftops. We will recommend GFCI outlets in area's that are close to water such as mop sinks, sinks used in salons for washing hair, water fountains, ice machines etc.

Phone: 573-221-0111 • Fax: 573-221-8191

Extension cords

Extension cords can't be used in place of permanent wiring. Power strips with the built in circuit breaker can be used. The cords shouldn't be run under rugs or furniture.

Gas Shut Offs

Shut offs are required for each gas appliance. They should be on the outside within 6' of the appliance.

Address #'s

Address numbers need posted on each business on the street side of the building. The minimum size of lettering is 4" tall and ½" width.

Stock Clearance

Extra stock shouldn't be stored any closer than 24" to the ceiling. If the building is equipped with a sprinkler system then an 18" clearance should be maintained around the sprinkler head.

Fire Extinguishers

All businesses are required to have a fire extinguisher. The minimum size is a 2A10BC, also known as a 5-pound extinguisher. Fire extinguishers are required to be hung or mounted, no higher than 5' to the top of the extinguisher. They shall be easily seen and accessible. The fire extinguisher is required to have an annual inspection by a company or person that is trained. Some of the local companies that can provide this service are:

- **Huck Finn Fire Extinguishers**, 573-248-9750
- **Quincy Fire Equipment**, 217-223-0612
- **Getz Fire Equipment**, 800-747-3473

Suppression Systems

If the business has a commercial kitchen then a suppression system will be required. If there is a system already in place then it will be required to meet the current code(s). They are required to be inspected semi-annually. Any of the above listed companies should be able to help provide this service or information.

All commercial kitchens are required to have a Class K extinguisher.

A commercial kitchen is defined as any place that cooks for more than 16 people or occupants.

Building Repair

Any holes in ceilings or walls will need to be filled or repaired. Smaller holes can be filled with fire retardant expanding foam while larger holes will require drywall. Any missing ceiling tile will need to be replaced.

Water Heaters

Water heaters must have a pipe connected to the relief valve. The piping shall extend to within 6" of the floor. No combustibles shall be stored within 30" of the heater.

Furnaces/Heating Appliances

No combustibles shall be stored within 30" of the heater or furnace.

General Housekeeping

Keep aisle ways clear enough for emergency services access. Keep old merchandise/clutter to a minimum.

Spray Finishing

Any spray rooms or booths will need to be protected by a sprinkler or suppression system. There are certain occupancies that require a sprinkler system only. These occupancies are Assembly, Educational, Institutional and Residential.

If you have any questions regarding these systems you can contact either the Building Inspectors office or the Hannibal Fire Department at the numbers listed above.

Sprinkler Systems

Sprinkler systems are required to have an annual inspection by a company or person that is trained in this area. Some of the companies listed above in the fire extinguisher section can provide this service.

If the building is protected by a sprinkler system then the system has to remain in service.
